

DingGo for fleet managers

The easiest way to manage car dings for your fleet

sgfleet - in collaboration with DingGo - is giving fleet managers an easier way to connect with independent repairers and manage minor repairs.

This online platform will save time and stress by allowing drivers to snap a few photos of their car damage, compare quotes from verified, local area repairers and then book their car in to be repaired.

This collaboration offers the following:

- Money savings: there is no cost for using the DingGo platform and the generated quotes are obligation-free
- Time savings: drivers snap a few photos of their damage and submit them - no driving around required
- Convenience: fleet managers can easily compare quotes from verified, local area repairers
- Visibility: notifications are generated at key stages of the process - the platform can also be used to check the status of all repairs
- Data consolidation: transactions will appear on the monthly **sgfleet** invoice and will be available in Fleetintelligence

If you have our Accident Management service in place, DingGo can be used to complement this by giving you greater control over damage costs that fall below your insurance excess.

Please note that this service is most appropriate for minor damage, where the vehicle is still driveable and the cause of the damage does not involve third parties.

Snap photos

All you need is your mobile phone and licence plate number to get started.

Compare quotes

Get obligation-free quotes and choose your best offer based on price, time to repair and repairer ratings.

Repair damage

DingGo works with a network of trusted and highly-rated repairers that offer a minimum 3-year warranty on their repairs. Simply book in a time that's right for you.
