Bookingintelligence
Easy and efficient resource management

Bookingintelligence - a resource management application that enables access to pools of resources online.

As managing pools of resources can be complex and logistically challenging, Bookingintelligence has a sophisticated search engine that enables the user to easily select the right resources to meet the requirements of the booking request.

Benefits

- **See the big picture** - Bookingintelligence has multiple views to allow both a detailed summary view or a quick snapshot of the entire resource pool.
- **Do things your way** - Resource managers can enter multiple resource types, locations, users, scheduling constraints, resource rate cards and other custom fields for ultimate control.
- **Manage on-the-go** - The solution has been designed to enable access to the system from any device, including Apple and Android.
- **Save money** - The inbuilt visualisation tools allow you to map your organisation's spending.

Bookingintelligence caters for the management of a wide range of "Resources", as illustrated below:
