

Commercial Vehicle Solutions

A fleet management and leasing guide

Commercial Vehicle Solutions

We realise managing a complex commercial fleet can be challenging in today's environment.

Why not focus on what is important to your business and let us help you manage your fleet, navigate the various challenges, and assist with controlling costs and compliance?

Our independent expertise in truck and mobile plant management has been developed over decades, enabling us to provide technical support and ongoing management services for the entire commercial vehicle life cycle.

Our services and solutions extend to:

- multiple leasing options
- initial commissioning, sourcing and acquisition
- maintenance, registration and toll management
- asset disposal, and
- regular reviews.

sgfleet will assist you with generating meaningful cost savings via the following processes:

Fleet analysis and evaluation

Improve fleet profile by lowering costs and reducing risk

Online data management

Oversee all fleet information via a user-friendly web portal, Fleetintelligence

Maintenance management

Reduce investment in fleet management software by outsourcing maintenance to a team of dedicated experts

Vehicle acquisition and disposal

Reduce administration costs and time, and maximise purchasing and disposal benefits

Leasing

Preserve valuable capital by leasing, including sale and leasebacks, and achieve a better return on investment

Telematics

Track vital data (e.g. driver behaviour/safety/compliance/tax credits) to improve fleet performance

Inspect365 (HVNL compliance)

Manage safety and defect inspections via online system providing progress and completion reports
