

# Bookingintelligence

The smart way to manage your shared resources

Bookingintelligence is an online resource management application that gives all users easy access to book and manage a variety of shared resources.

Effective management of shared resources doesn't have to be complex and challenging with Bookingintelligence. It has a sophisticated search engine that helps find the right resource, in the right place, at the right time.

## Benefits

- **See the big picture, or a smaller one** - choose from multiple views - simple oversight of the entire resource pool, a detailed summary of a single asset, and everything in between.
- **Do things your way** - you decide on the resource types, locations, approved users, scheduling constraints, resource rate cards, and other custom fields - for ultimate control.
- **Manage on-the-go** - easy access, anytime, from any device, desktop or mobile.
- **Save money** - spend less time and resources managing shared resources, and enjoy better asset utilisation and efficiency.

Bookingintelligence lets you manage all sorts of shared resources:

| RESOURCES                | EXAMPLES   | INCLUDED |
